

Pradeep Kumar

Software Developer with 5+ years of experience

Email: pradeepravi.cse@gmail.com

Mobile: +91 88075 45800

Location: Ranipet, India

Summary

- Hands-on experience in creating web applications using React
- Extensively worked on SPA using React, Redux, Jest and Enzyme, CI/CD with Github and Azure DevOps

Skills

Technologies	React, Redux, Jest & Enzyme, HTML, CSS, Javascript, Bootstrap, Typescript, React DND
Design Tools	Adobe Illustrator, Photoshop, XD and Figma
Version Control	Git
Build Tools	Webpack, Parcel
DevOps	Azure DevOps, VM Configuration, Hosting, Domain Management
Operating System	Mac OS, Windows, Linux - Ubuntu

Work Experience

Mindgraph Technologies Private Limited

Sr. Software Engineer

08/2021 – Present

PROJECTS

5G Onboarding

Client: Accenture - Malaysia

TM 5G onboarding which helps user to get a new 5G connection with appropriate plans

Front-end Technology: NextJs,HTML, CSS, Bootstrap, Typescript, And Design

Virtusa Consulting Service limited

Consultant

04/2020 – 07/2021

PROJECTS

POS Application

POS has three different projects beginning with Showcasing the products to purchasing it and setting up the POS

Front-end Technology: ReactJs, React-Redux, HTML, CSS, Bootstrap, Typescript, Material-UI

Roles and Responsibilities:

- Developing Error-Free React Modules with Typescript
- Code using shorthand methods with ES6 Functions
- Effectively maintaining state using Hooks, React-Redux and Context API
- Effectively handling API Data with promises, async, and with AXIOS client
- Writing Test cases for functional components to ensure the code quality

Unificater Developer

Application which helps for end to end data processing and visual programming solutions. Unificater developer will simplify the way you connect with your data sources, give you deeper insights into your business and provide all the data you need to make informed business decisions.

Front-end Technology: ReactJs, React-Redux, HTML, CSS, Bootstrap, Typescript, Material-UI, Ag-Grid, React DND

Roles and Responsibilities:

- Designing front end architecture
- Managing CI/CD pipeline in Azure
- Managing team members to develop feature on time
- UI/UX Designing
- Streamlining the workflows with effectively implementing Agile Methodology
- Managing task for the team members using JIRA Tool

- Streamlining the code versioning properly using GitHub
- Implementing various resources in github to increase productivity such as (Netlify deploy preview, Circle CI, etc)
- Developing Error-Free React Modules with Typescript
- Code using shorthand methods with ES6 Functions
- Effectively maintaining state using Hooks, React-Redux and Context API
- Effectively handling API Data with promises, async, and with AXIOS client
- Writing Test cases for functional components to ensure the code quality

Capsule8 India Private Limited

Web Developer

08/2019 – 04/2020

PROJECTS

Capsule8 Protect

Capsule8 Protect (zero-day protection) is about securing Linux-based workspaces and containers. This involves collecting logs(Alerts), terminating the process which created the alert from the capsule8 sensor installed in the workspace, processing the logs, and displaying them to the user in a meaningful manner.

Front-end Technology: ReactJs, React-Redux, HTML, CSS, Bootstrap, Typescript

Roles and Responsibilities:

- Developing Error-Free React Modules with typescript
- Code using shorthand methods with ES6 Functions
- Effectively maintaining state using Hooks and React-Redux
- Creating Custom Hooks for various Components
- Effectively handling API Data with promises, async, and with AXIOS client
- Writing Test cases for functional components to ensure the code quality

Blueally InfoTech Private Limited

UI/UX Designer

11/2017 – 06/2019

PROJECTS

Managed Security Services and Managed Authentication Services

Security Information and Event Management (SIEM) is about securing the Client's Workspace and Network. This involves collecting and processing Network Logs from security perimeter devices and makes analyses on the logs to provide security information over the customer network.

Technology: Angular 4+, D3js, Node.js, HTML, CSS, Bootstrap, REST, Typescript

Database: Postgres 8.4, MongoDB

Server: Wildfly, Nginx, pm2

Roles and Responsibilities:

- Gathering requirements from Business Analyst Team/ Client
- Analyzing the requirements and brainstorming the requirements.
- Structuring the best user flow for the requirements
- Creating usable low fidelity/high fidelity wireframes.
- Creating a stunning visual design with a good color accent and typography
